Implementation Plan for the Antimicrobial Resistance Strategy Framework in South Africa 2014-2019

The Implementation Plan for the Antimicrobial Strategy Framework in South Africa is now available for download from www.health.gov.za. The purpose of this document is to set out the activities and tasks required by the various stakeholders to ensure the implementation of the National Antimicrobial Resistance Strategy Framework, launched on 16th October 2014 by the Minister of Health.

By ensuring the appropriate use of antimicrobials by health care professionals in South Africa, the efficacy of antibiotics can be conserved for the optimal management of infections in human and animal health.
