CERTIFICATE OF INDEPENDENT BID DETERMINATION

1 This Standard Bidding Document (SBD) must form part of all bids\(^1\) invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).\(^2\) Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:

   a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.

   b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

---

\(^1\) Includes price quotations, advertised competitive bids, limited bids and proposals.

\(^2\) Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

Terms of Reference for a service provider to estimate private health expenditures to National Health Accounts

1. Background
National Health Accounts (NHA) provides a systemic description of financial flows related to consumption and production of health care goods and services within a health system of a country. The South African health care system is a mixture of a government or publicly funded and market modified system, consisting of a tax-funded health system for the majority, and medical schemes for a relatively small proportion of the population (17 percent, 8.3 million beneficiaries). Total Health Expenditure for 2016/17 was projected at R 377,6 billion which is 8.3% of GDP. Of which 4.0% is public health expenditure as percentage of GDP (NDP - 2030, 2012, 330. and NHI White Paper, 2015, 47).

The private sector consists of for-profit providers, like health care professionals, health care institutions and medical aid administrators, who are funded either through non-profit medical schemes, health insurance policies or out-of-pocket household’s income.

The System of Health Accounts (SHA) framework is an internationally accepted methodology for summarising, describing and analysing the financing of health systems. SHA 2011 framework include public, private, household and donor expenditures. It links all four functions of a health system to the three axes of health accounts, namely, consumption, provision and financing.

The NHA was formally institutionalised in SA in August 2014 and the first NHA estimates for SA (2013/14) are expected before the end of the 2016/17 financial year. National Department of Health (NDoH) requests support during the implementation of NHA by providing technical support, capacity building and knowledge transfer in mapping private expenditures on health according to the existing methodology of National Health Accounts in South Africa. It is expected that the work will consist of mapping the information of expenditure of medical schemes as captured by the Council for Medical Schemes’ Annual Statutory Returns (2014-2018) to internationally defined codes of the SHA 2011 in close collaboration with NDoH as well as mapping out-of-pocket payments (OOPs) (2014-2018) into all relevant dimensions of NHA in South Africa. The work also includes building capacity at the National Department of Health and the knowledge transfer to representatives of NDoH during the duration of the contract.
