**CONTRACT NUMBER HP17-2021TWDV: THE PROVISION OF
PHARMACEUTICAL TRANSPORT, WAREHOUSING AND DISTRIBUTION
SERVICES FOR COVID-19 VACCINES FOR THE PERIOD
01 APRIL 2021 TO 31 DECEMBER 2022**

ADDENDUM 3: DSV HEALTHCARE (PTY) LTD - PRICE ADJUSTMENT

Please amend your records for the following DSV Healthcare (Pty) Ltd prices, effective 1 April 2022.

Item No	Description	Cold Chain Solution	Current Price	Revised Price
Part B	Logistic Services for Transport, Warehouse and Distribute Covid-19 Vaccines	-70°C	R19.61	R20.49
Part B	Debtor Administration and Cash Collection	-70°C	R2.08	R2.17

In the event that an incorrect price adjustment was made during the calculation of the contract price adjustment, the Department of Health reserves the right to adjust the price in accordance with the correct calculation.

Yours faithfully,

K JAMALOODIEN
DIRECTOR: AFFORDABLE MEDICINES

HP17-2021TWDV: THE PROVISION OF PHARMACEUTICAL TRANSPORT, WAREHOUSING AND DISTRIBUTION FOR COVID 19 VACCINES – REQUEST FOR ANNUAL INCREASE APPLICABLE 1 APRIL 2022

The Logistics Services Agreement (the “LSA”) between DSV and the NDOH, which governs the provision of the warehousing and distribution of the Covid 19 vaccine makes provision for an annual review of the price. Clause 11.7.4 of the LSA provides as follows:

Clause 11.7.4 of the LSA:

The service provider is required to apply for the annual price adjustments by 28th February each year, which adjustment will be effective from 1st April of the same year. The adjustment methodology is CPI.

DSV is applying for the price adjustment of the warehousing and distribution services, as well as the cash collection services which are provided in terms of an addendum to the LSA catering for an expansion of the services.

According to Stats SA the CPI headline year on year from December 2020 to December 2021 is 4,5% (Four comma five percent) per the extract and link below:

http://www.statssa.gov.za/?page_id=1859

Extract from publication:

Annual average headline consumer price index for 2021

Average annual consumer price inflation was 4,5% in 2021 (i.e. the average CPI for all urban areas for 2021 compared with that for 2020). This was 1,2 percentage points higher than the corresponding average of 3,3% in 2020.

Kindly thus approve an increase for the distribution and cash collection services of 4,5% (four comma five percent) with effect from 1 April 2022. The new rates would thus be as follows, VAT inclusive:

Service per vial	Old price per vial (VAT inclusive)	New price per vial from 1 April 2022 (VAT inclusive)
Covid 19 vaccine (Pfizer -70) Warehousing and Distribution	R19.61	R20,49
Covid 19 vaccine (Pfizer -70) Cash Collection	R2.08	R2,17

Await your confirmation.

Yours Sincerely

Tracey Glover
Commercial Director

To: Rob Botha <rob.botha@za-scta.com>

Good Day Rob

Sorry to bug you. I know you are very busy. I am starting to prepare for HP17's price adjustments as per the RFP all applications must be received by 28 Feb 2022 for effective 1 April 2022. Therefore I must process the first week of March to obtain a signature ect. However it does state in the RFP that the adjustment will be based on CPI.

There is an indication of the average consumer inflation price of 4.5% am I reading this correctly?
Transportation increase yearly is 16.8%
and
Miscellaneous goods and services was 4.3%

As I usually do calculations for CPA on the ROE and this one is slightly different referring to the CPI, would you please guide me as to which % I should be looking at.

Taking into count for example DSV has applied for a new transportation price as well as a Cash Collection price.

Kind Regards

Bernadette Stevens

Morning

According to the contract, it is CPI which is, as you say, 4,5% - so we will need to use that. Any application for prince increases above that should be reduced to CPI and anything below CPI can be accepted.

Copying Anita for input.

Hope this helps.

Kind Regards

ROB BOTHA

Dear Bernadette and Rob

The contract does specify that CPI is the applicable index for escalations on HP17. However, which CPI (average annual or latest annual) is not exactly specified.

The application made by DSV utilized average annual CPI for 2021 4.5% and is significantly lower than the headline annual consumer price index of 5.9% for Dec 2020 to Dec 2021.

The only additional comment I would have around the CPA which is also not detailed in the HP17 contract itself is that bid date was February 2021 (not Dec 2020) and thus it would be more applicable to use the January 2021 index as the opening index rather than the average annual index (4.5%). In this event the escalation would have equated to 5.5% which is still significantly lower than the application for 4.5%. Thus a background comment but a moot point.

Finally, the addendum for the cash collection fee has the same commencement date (12 May 2021) as the main agreement thus the escalation application for the cash collection rate would be applicable for the same timeline.

Please feel free to contact me should you require any further detail or clarification.

Kind regards,

Anita Read

GENERAL INFORMATION	12

KEY FINDINGS

Headline consumer price index (CPI for all urban areas)

Annual consumer price inflation was 5,7% in January 2022, down from 5,9% in December 2021. The consumer price index increased by 0,2% month-on-month in January 2022.

The main contributors to the 5,7% annual inflation rate were food and non-alcoholic beverages; housing and utilities; transport; and miscellaneous goods and services.

Food and non-alcoholic beverages increased by 5,7% year-on-year, and contributed 1,0 percentage point to the total CPI annual rate of 5,7%.

Housing and utilities increased by 4,3% year-on-year, and contributed 1,1 percentage points.

Transport increased by 14,5% year-on-year, and contributed 1,9 percentage points.

Miscellaneous goods and services increased by 4,6% year-on-year, and contributed 0,7 of a percentage point.

In January the annual inflation rate for goods was 8,1%, down from 8,5% in December; and for services it was 3,4%, up from 3,3% in December.

Note: Not all items in the CPI are surveyed every month. Table F shows the survey schedule for items that are not surveyed monthly.

Risenga Maluleke

Statistician-General

IMPORTANT NOTES**Changes to the method of collecting price data from retail stores**

Price information for categories of products typically purchased in retail outlets is currently collected by Stats SA fieldwork teams using paper forms. Starting in the first quarter of 2022, the paper forms will be replaced by tablets. Prices will be collected using a custom application which includes quality control and management modules. The new collection method is expected to improve the quality and speed of data collection and processing.

Covid-19

Resulting from COVID-19 health protocols, retail-based prices recorded across all regions (including online prices) have been pooled to create national average price changes which are then applied to each elementary index at a regional level. This means that the geographic index (including total country) changes will, in the main, vary according to different weights and not different price changes.

Reweighting and rebasing

The weights of the CPI have been updated with effect from this release. Changes were also made to the basket of goods and services. All indices have been rebased so that December 2021 = 100. For further information please see the information note available on the Stats SA website at http://www.statssa.gov.za/?page_id=2528.

DETAILED RESULTS

Table A - Consumer Price Index: Main indices

Unless otherwise stated the table refers to all urban areas.

Group			Weight	Index (Dec 2021=100)			Percentage change

Additional surveys are conducted for these items when Stats SA is aware of significant price changes outside regular survey months.

GLOSSARY

A complete set of definitions is available in the methods and sources document on the Stats SA website http://www.statssa.gov.za/?page_id=2528

Annual inflation rate	The annual inflation rate is the change in the index of the relevant month of the current year compared with the index of the same month in the previous year expressed as a percentage.
Annual percentage change	The annual percentage change is the change in the index of the relevant month of the current year compared with the index of the same month in the previous year expressed as a percentage.
Average annual inflation rate	The average annual inflation rate is the change in the average index of one year compared with the average index of the previous year expressed as a percentage.
Average annual percentage change	The average annual percentage change is the change in the average index of one year compared with the average index of the previous year expressed as a percentage.
CPI for administered prices	An administered price is defined as the price of a product which is set consciously by an individual producer or group of producers and/or any price which can be determined or influenced by government, either directly or through a government agency/institution without reference to market forces. Products and services included are assessment rates, water, electricity, paraffin, petrol, diesel, public transport – trains, motor licences, motor registration, telephone fees, cell calls, television licence, school fees, university/technicons/colleges and university boarding fees.
CPI for regulated prices	Regulated prices are those administered prices that are monitored and controlled by government policy. To this end, price regulation does not necessarily imply the presence of an economic regulator, but the restriction on the extent to which prices may vary, depending on government's policy objective. Products and services included are water, electricity, paraffin, petrol, diesel, telephone fees and cell calls.
CPI per expenditure decile	Decile 1 - up to R 20 140; Decile 2 - R 20 141 up to R 33 619; Decile 3 - R 33 620 up to R 48 673; Decile 4 - R 48 674 up to R 65 213; Decile 5 - R 65 214 up to R 84 698; Decile 6 - R 84 699 up to R 109 163; Decile 7 - R 109 164 up to R 143 174; Decile 8 - R 143 175 up to R 199 920; Decile 9 - R 199 921 up to R 312 246; and Decile 10 - R 312 247 and more.
Inflation rate	The inflation rate is the change in the CPI for all items of the relevant month of the current year compared with the CPI for all items of the same month in the previous year expressed as a percentage.
Monthly percentage change	The monthly percentage change is the change in the index of the relevant month compared with the index of the previous month expressed as a percentage.
Rural CPI	The rural CPI is compiled using data from rural and urban areas in accordance with the purchasing patterns of rural residents.

GENERAL INFORMATION

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

Advance release calendar

An advance release calendar is disseminated on www.statssa.gov.za

Forthcoming issues

Issue	Expected release date
February 2022	23 March 2022
March 2022	20 April 2022
April 2022	18 May 2022
