

CALL FOR SUBMISSION OF ENVIRONMENTAL HEALTH-RELATED RESEARCH PUBLICATIONS

The National Department of Health through the Environmental Health Directorate, invites Environmental Health Practitioners, researchers, academics, students and other interested parties to submit formal, academic and scientific research publications such as research articles, book chapter, conference paper or poster for inclusion in the National Environmental Health research repository.

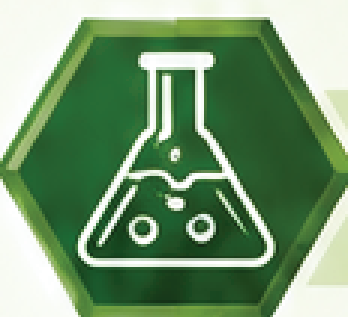

Purpose:

The aim is to have a comprehensive accessible research repository that will support evidence based policy development, strengthen national coordination and promote peer learning among Environmental Health Practitioners.

Submission requirements:

- 1 Articles must be formal, academic and scientific
- 2 Articles must relate to Environmental Health within the South African context
- 3 Submitted articles must be original and must not violate copyright
- 4 Submissions may cover but not limited to the following research focus areas:
 - Chemicals Management
 - Climate Change and Health
 - Environmental Management and Pollution Exposure and Control
 - Surveillance, Prevention and Control of Diseases
 - Food Safety
 - Environmental Hygiene, Environmental Health and Administration and
 - Other environmental health related topics.
